

Isaac Kaczor

Statistics, econometrics & the systems that put them to work.

Munich, Germany isaac.kaczor@gmail.com isaac-kaczor.vercel.app github.com/Kaczor594 English (native) · German (C1)

I build statistical tools teams actually use to make decisions — forecasting, bidding, and measurement systems that explain themselves to the person whose budget they steer.

EXPERIENCE

Analyst · Associate Consultant

Municipal Analytics · Remote 2025 —

- Client-facing consultant advising municipal water, sewer & energy utilities on 20-year financial forecasts, rate studies, and fiscal-impact analyses — leading client meetings and public board presentations.
- Built an R/Python/SQL analytics workspace replacing ad-hoc Excel; standardized SQL ETL for reuse across client engagements.
- Architected an AI data-access layer (Cloudflare Workers + Claude via MCP) so staff query financial data in natural language.

Performance Marketing Manager → Bidding Model Lead

Holidu GmbH · Munich 2021 — 2025

- Owned the Google Ads bidding model steering up to **80% of company revenue** and **~€100k/day** in ad spend across European markets — one of three people with full understanding of the system.
- Doubled model-driven profit year over year, **€2.4M → €5M+**, on **€25M+** of revenue; team beat company-wide KPIs 1–3 months early.
- Rebuilt the model's logic around marginal-profit analysis using independent GLM/regression studies, applied as dynamic correction factors.
- Owned the data pipeline behind it (dbt, Airflow, AWS Redshift/Athena); A/B-tested every non-trivial change; built a LOESS tool that halved weekly manual time.

Research · Senior thesis

Kalamazoo College · Mathematics 2020 — 2021

- Poisson & Gamma GLMs for Bundesliga outcomes in R; models matched or beat betting-market predictions across the tested seasons (Pearson 0.89, Spearman 0.88).

EDUCATION

BA, Business Administration

Kalamazoo College, USA 2021

- Concentrations in Statistics & Mathematics (econometrics, mathematical statistics). Dean's List. Senior thesis written in R.

Exchange · Study abroad

FAU Erlangen–Nürnberg, Germany 2019 — 2020

- Statistics & business coursework in German — contributed to C1 proficiency.

SKILLS

Languages	R · SQL · Python
Statistics	GLMs · forecasting · A/B testing · distribution fitting · bootstrap / Monte Carlo
ML	XGBoost · random forests · calibration · SHAP
Data	Airflow · dbt · AWS (Redshift, Athena) · ETL pipelines
BI	Looker · Power BI · Streamlit

CURRENTLY

Actuarial certification · DAV track

Self-study alongside analytics work 2025 —

- Pricing, reserving, and the statistics underneath them.

LIVE PROJECTS

- World Cup 2026 prediction model — player-level ratings, 10,000-run Monte Carlo, live dashboard, evaluated vs. market consensus.
- March Madness model — XGBoost over 16,691 NCAA games with walk-forward evaluation, calibration, and SHAP.
